

## Press release

**Date:** 19/09/2022

**You can really smash it!**

### **The blade set for really tough screwdriving jobs.**

**Wuppertal.** The new Kraftform Kompakt 900 is a screwdriving tool with an optional impact wrench function. It combines the advantages of manual impact wrenches, compact tools and screwdrivers with pound-thru blade.

Stubborn screw connections can be worked on with a loosening moment of up to 25Nm. The pound-thru blade ensures complete power transmission (zero loss).

For exceptional practicality: The impact wrench function and screwdriver function can be switched as required.

The robust bit holder allows the mounting of 25 specialised extra tough bits for various screw profiles.
