

## Press release

**Date:** 1/6/2025

### **The Tool-Check Modular system:**

#### **A miracle of space, for combining and expanding**

Wouldn't it be great if you could combine tools for specific applications, creating a personalized tool collection that's easy to take with you? With everything staying together, and nothing getting lost? And when you're ready to start working, you simply unfold the set?

The Tool-Check Modular system offers exactly that: the possibility to combine Tool-Check Modular products with various screwdriving tools in a super-compact way, depending on your needs.

The aces in your sleeve are the rigid adapter 9549 (for connecting) and the flexible hinge 9550 (for folding). Both accessories are included in the sets, as are the three Tool-Check Modular modules.

The Tool-Check Modular products can be combined, exchanged, or expanded at any time.

In addition to the comprehensive sets, the adapter, and the hinge, the range also offers four modules, with possible expansion options: a 7-piece L-key set, a 22-piece Micro bit set, and two 21-piece sets for manual and machine operations.
