The Wera Advent Calendar 2025 – celebrate screwdriving

As the year draws to a close and the first snowflakes fall, it's time for little joys – and big surprises.

For everyone who loves great Advent calendars, the new Wera Advent calendar is now available, filled with a complete screwdriving workshop for the most common applications and screw profiles.

Behind the 24 doors real highlights are hidden: 15 high-quality screwdrivers, including two slotted VDE tools for safe work, two compact Stubby screwdrivers for tight screw connections, three Micro tools for precision mechanics and a robust Chiseldriver with impact cap and pound-thru blade.

The T-handle bit holder for ¼" bits ensures powerful torque transfer and makes even difficult-to-reach screws accessible using one of the the three long bits (89 mm).

The two screw grippers hold screws securely on screwdriver blades, bits and L-keys – for stress-free working also in tricky situations.

And of course, the calendar wouldn't be complete without the bottle opener in an exclusive calendar design, a faithful companion for your well-deserved breaks.

Two practical racks ensure tidy storage – whether on the workbench or mounted on the wall. This turns every moment of screwdriving into a celebration of tidiness.

With a passion for tools, attention to detail – and a big heart for everyone looking forward to Christmas: the Wera Advent calendar 2025 is more than just a product. It is an almost sensual experience and over the years has become a real ritual.
